

**Why do we need
a new brand?**

Google has had a number of logo changes over the years for a variety of reasons, such as changes in the company's strategy and the evolution of technology.

The key reasons for the changes:

-  Reflecting growth and change
-  Simplification and minimalism
-  Adaptation to devices
-  Single brand creation

PwC estimates that by 2030, the contribution of AI to global GDP could reach

\$15,7 trillion

Statista analysts expect the cloud computing market size to exceed

\$1 trillion

by the end of 2028, driven by strong adoption of cloud solutions across various industries

IDC estimates that between 2018 and 2025, the amount of data created by humans will grow from

33 > 175 zettabytes

1 zettabyte = 1 billion terabytes

In 2025, NITEC will celebrate its 25th anniversary. With a quarter of a century behind us, we are ready to begin our new chapter, preserving and enhancing all that has made us unique, while focusing on our core strengths.

The company's new communications strategy will be based not only on technological expertise, but also on the ability to create emotional connections with audiences, demonstrating an innovative approach.

The new NITEC

Honouring the brand's 24-year history, we are ready to move confidently into the future by 'rethinking' and 'reassembling' ourselves.

Leaving behind everything that made us unique, we aim to simplify our visual style, eliminate outdated attitudes and reinforce our strengths.

Customer value creation is directly related to brand capitalization. The more value a brand adds through quality, innovation or unique experiences, the higher its market value. Brands that build long-term, high-quality relationships with customers increase their reputation and capitalization.

It is also where NITEC intends to grow.

By developing a product approach, brand capitalization can be increased and projects can be perceived as high quality and innovative, allowing them to keep prices high and generate stable revenues despite competition.

At the end of 2023, Google, part of Alphabet Inc. had a capitalization of

~\$1,7 trillion

Amazon's capitalization at the end of 2023 was

~\$1,3 trillion

Intel's capitalization for 2024 is estimated to be

>\$200 billion
